

# WiFlyer<sup>®</sup>+v

Portable Wireless-G Bridge, Access Point  
And Router with Internet Telephony

## Instantly add phone, data and network printer connections anywhere within range of a Wi-Fi network!

With the WiFlyer+v, now you can instantly set up a complete office at home or on the road – wirelessly. Operating as a wireless 802.11g bridge, the WiFlyer+v instantly offers a high-quality phone line, two 10/100 Ethernet data ports and a USB network printer connection – wherever Wi-Fi is available. Using standard Voice-over-IP protocols combined with voice Quality of Service (QoS) and industrial-strength wireless security (WPA-PSK), the WiFlyer+v ensures reliable phone service and complete protection of your data and phone calls. What's more, you can even share a single standard telephone for both Internet and land line phone calls, with all 911 calls automatically routed over the land line (when connected) for emergency location identification.

The WiFlyer+v is being offered together with full Internet telephone service through its standard telephone jack. You can choose a local phone number across the U.S. regardless of where you live, and make unlimited phone calls in the U.S. and Canada for an incredibly low fixed monthly price. Premium features such as Call Waiting, Caller ID, Voicemail, Call Forwarding, and many others come free with the WiFlyer Phone Service.

In addition to serving as your complete home office hub as a wireless bridge, the WiFlyer+v can be configured to become a wireless access point as well. In access point mode, you can spread Wi-Fi throughout your home while supporting wired phone, data and printer connections. Configure your entire home with multiple WiFlyer+v units to add phone lines wherever convenient and ensure voice QoS across the entire network.

As either a bridge or access point, the WiFlyer+v supports WEP/WPA wireless security, a DHCP server, SPI and NAT firewalls, VPN pass-through, and easy configuration via browser.

The WiFlyer+v has an MSRP of \$149.95, but is \$59.95 with activation of the WiFlyer Phone service. Available December 2005.
